

## GIFTS WITH A HEART

**Gifts with a Heart** grew out of a need for some very special young ladies to find a job that was both fulfilling to them and also offered them a source of income. What makes these young ladies unique is the fact that each one is differently-abled.

After finishing school, these ladies found themselves in a world that, for the most part, offers little socially and vocationally for young adults with special needs. Job opportunities just didn't come their way.

After much brainstorming with parents who were 100% behind them, a gift-basket business idea was born. Elizabeth Bailey, who had experience in the business, as well as a heart for adults with disabilities, threw herself wholeheartedly into the project as their teacher, mentor, and friend—thus the beginning of Gifts With A Heart
